Invensys and Transpara Announce Global Partnership

Invensys to use Transpara's Visual KPI to help customer plant personnel to remotely monitor process variables and KPIs from their existing mobile communications devices

Pleasanton, Calif. and Foxboro, Mass. –March 7, 2007 – Transpara Corporation and Invensys Process Systems today announced a global partnership, through which Invensys Process Systems becomes a global reseller and certified implementer for Transpara's Visual KPI operations intelligence software. The only composite Key Performance Indicator (KPI) engine available on the market, Visual KPI delivers on-demand, business-critical data about process manufacturing and utility operations to any handheld or desktop browser.

"Transpara's innovative Visual KPI technology will provide important incremental value for our large installed base of automation customers," said Chris Lyden, vice president of global marketing at Invensys Process Systems. "This new technology will enable personnel in our customers' process manufacturing and utility plants to remotely monitor – in near-real-time – both process variables and custom-defined KPIs from their familiar handheld mobile computing or communications devices, including both PDAs and SmartPhones."

Consistent with Invensys' open, platform-independent solution approach, the composite source data for the KPIs can come from a variety of different data sources, including OSIsoft's PI System or Invensys' own InSQL or InFusion plant historians, working in conjunction with any Invensys or non-Invensys automation, information, or computerized maintenance management platform.

With Visual KPI, users can easily create and customize composite KPIs and scorecards using data from any combination of existing systems – including OSIsoft's PI System, SQL Server, Oracle, OLE DB and Web Services – and publish them for instant use by anyone in the organization or supply chain, from plant floor managers to executives. By delivering actionable, decision-support information directly to the responsible user, Visual KPI offers real-time insight into

organizational performance, lowering business risk and promoting corporate transparency.

About Invensys
Invensys is the world leader in industrial asset performance management. In addition to its rapidly expanding Global Solutions and Performance Management services groups, Invensys' automation businesses includes industry-leading brands such as Foxboro, Triconex, SimSci-Esscor, Wonderware, and Avantis, whose products are installed in more than 100,000 plants across the world. These range from small hybrid and batch plants to the world's largest upstream projects, refineries, gas plants, petrochemicals plants, power plants, and pulp and paper mills. For more information on Invensys' process automation businesses, please visit www.invensys.com/ps.

The Invensys Group (www.invensys.com) is headquartered in London and is listed on the London Stock Exchange, with approximately 30,000 employees working in 60 countries.

About Transpara
Transpara delivers operations intelligence software that provides mobile professionals in the process and utility industries with real-time asset and operating data on any web browser, whether on hand-held devices or the desktop. Transpara's Visual KPI ensures that responsible parties throughout the organization and supply chain, from plant floor managers to executives, have on-demand access to business-sensitive information, enabling stakeholders to create and distribute Key Performance Indicators in order to monitor their entire asset base. With Transpara, customers reduce operating costs and lower business risk by promoting corporate transparency and ensuring compliance with regulatory requirements such as Six Sigma, Title V and Sarbanes-Oxley. Transpara is headquartered in Pleasanton, Calif.
