TRANSPARA SELECTED AS MICROSOFT CERTIFIED ISV PARTNER

Microsoft-Certified Operations Intelligence Software Provides Process Manufacturing and Utility Organizations with On-Demand, Mobile Access to Business-Critical Data

Pleasanton, Calif. – April 17, 2007 – Transpara Corporation today announced the company has been selected as a Microsoft Certified ISV (Independent Software Vendor) partner. The only composite Key Performance Indicator (KPI) engine available on the market, Visual KPI delivers business-critical data about process manufacturing and utility operations to any browser. Based on the familiar platform of Microsoft Excel, Internet Information Server and SQL Server 2005, Visual KPI works with the 2007 Microsoft Office system, including Excel Services and Office SharePoint Server 2007.

Transpara's Visual KPI 2.1 operations intelligence software met the criteria for the Microsoft Platform Test for ISV Solutions program: Windows Server and SQL Server 2005. Microsoft ISV Partner Certification testing was completed by VeriTest ®, the testing service of Lionbridge (Nasdaq: LIOX). The full certification results earned by Visual KPI may be viewed at www.lionbridge.com.

"Our enhanced ISV relationship with Microsoft demonstrates Transpara's commitment to our customers, who can further leverage their investment in Microsoft infrastructure with our certified Visual KPI software," said Michael Saucier, CEO of Transpara. "Our customers demand the highest level of integration as they introduce new technologies onto the plant floor. Microsoft's certification of Visual KPI offers customers fast, straightforward deployment and immediate ROI in extending timely and critical operations data to PDAs, SmartPhones and Blackberries."

With Visual KPI, users can easily create and customize composite KPIs and scorecards without any additional programming, access data from any combination of existing systems – including Excel Services, Business Scorecard Manager, any ODBC data source and OSIsoft's PI system – and publish them for instant use by anyone in

the organization or supply chain, from plant floor managers to executives.

About Transpara
Transpara delivers operations intelligence software that provides mobile professionals in the process and utility industries with real-time asset and operating data on any web browser, whether on hand-held devices or the desktop. Transpara's Visual KPI ensures that responsible parties throughout the organization and supply chain, from plant floor managers to executives, have on-demand access to business-sensitive information, enabling stakeholders to create and distribute Key Performance Indicators in order to monitor their entire asset base. With Transpara, customers reduce operating costs and lower business risk by promoting corporate transparency and ensuring compliance with regulatory requirements such as Six Sigma, Title V and Sarbanes-Oxley. Transpara is headquartered in Pleasanton, Calif.
